UMAREX®

ZEROED IN

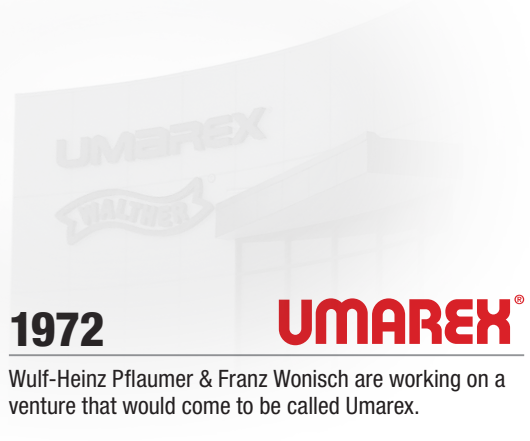

THE UMAREX® STORY

1972

Wulf-Heinz Pflaumer & Franz Wonisch are working on a venture that would come to be called Umarex.

1993

Umarex acquires world renowned arms manufacturer, Carl Walther.

2006

RUAG Ammotec USA, a US distributor of RWS air rifles, is purchased by PW Intl GmbH, moved to Fort Smith, Arkansas and renamed to Umarex USA.

2008

Umarex USA expands air rifle line with the introduction of Ruger®, Walther® and Hammerli®.

2009

Umarex USA continues to grow doubling sales over 2008 and breaks ground on a new facility.

2010

Umarex USA moves into a new manufacturing and warehouse facility at Chaffee Crossing in Fort Smith, Arkansas.

2013

Umarex USA welcomes Walther Arms to their campus in Fort Smith, Arkansas, and breaks ground on a 7 million dollar warehouse expansion.

2014

Umarex USA introduces the UX mark. The UX is incorporated into airguns and marketing materials creating a powerful mark that is eye-catching and memorable.

TODAY

Umarex continues to innovate and remains the “King of Replicas.” No other company offers as many well-known replica handguns. Umarex continues to pave the way for new airgun shooters with its Gauntlet® and innovative big bore introductions.

UMAREX

UMAREX AIRGUNS

Innovation is the driving force behind Umarex. This forward thinking mentality has led to name-brand partnerships and the development of cutting-edge airgun technology. From the beginning, Umarex has been a leader in firearm replicas. The "King of Replicas" represents well-known firearm brands such as Beretta®, Browning®, Colt®, GLOCK™, Heckler & Koch®, Ruger®, Smith & Wesson*, and Walther®. Over the years, Umarex has become a household name because of the attention to detail and technology that goes into making each air rifle. Today, Umarex continues to break ground in the airgun industry by pursuing patented inventions and creating new products that deliver exceptional performance and quality.

.22 10-shot mag - 2252611

NOW THERE'S A PCP FOR EVERYONE

FEATURES

- 50% less pumping
- Patented Ever-Pressure Tank system
- Just 13 pumps to first shot!
- Easy side-lever cocking
- Includes [2] 10-shot rotary magazines

THE ORIGIN OF HIGH PRESSURE AIR

The Umarex Origin – High Pressure Air Pump Combo is the perfect economical option for entry into pre-charged pneumatic airgunning. With the patented Ever-Pressure Tank (EPT) system, the ease of filling the Origin with air is revolutionized and requires no additional equipment purchases. Quiet, powerful, accurate, and easy to operate, the Origin is THE first choice for a shooter's first PCP rifle.

UMAREX® HAMMER

Magazine - 2252637

THE AIR RIFLE THAT'S MADE FOR BIG GAME

For those that have witnessed the power of the Hammer in hunting situations, there's no doubting the knock-down generating impact it creates. Combining a .50 caliber projectile, its weight, deformity of the slug, and a faster muzzle speed, the Hammer dumps a ton of energy into its target, without carrying that energy through the target.

FEATURES

- 3 full power regulated shots + 2 additional shots
- Ultralight 4500 psi, 24 cu in. carbon fiber tank
- Modern stock design with M-LOK® locations
- Patent-Pending Lightspeed™ valve
- Precision barrel
- Sound absorbing composite full barrel shroud
- Picatinny rail (20 slots, 8.5" long) - light weight machined aluminum rail
- Patent-Pending 2-shot linear magazine, 2 included
- Straight-pull bolt with 2 lb pull weight, 2 in. travel
- Three safeties: magazine lock-out (won't fire w/out mag), trigger block safety, field carry safety

FILLING THE HAMMER WITH AIR

The Umarex® Hammer requires a minimum of 3,000 pounds per square inch of normal atmospheric air to operate—4,500 psi to achieve its three full-power shots. Hand pumps rated at 4,500 psi can be used to fill the tank, but air compressors are generally the most convenient and efficient option. Small shop or construction tool compressors won't have enough power for this job, making electric high pressure air compressors the best option. In the field, 90 cubic inch SCBA or carbon fiber "buddy" tanks are quite convenient. These tanks also require 4,500 psi when being used with the Hammer and can be filled at air filling stations and willing scuba or dive shops.

INNOVATIVE TECHNOLOGIES

T.N.T — Today's modern air rifles use the power of nitrogen filled gas pistons.

REAXIS GAS PISTON — The first gas piston that was reversed. This generates more power, more velocity, and more impact.

STOPSHOX ANTI-RECOIL SYSTEM — A technologically advanced anti-recoil and anti-vibration system located at the rear of select Umarex-made air rifles.

SILENCAIR Airgun Silencing System — A 5-chamber noise dampener that is permanently affixed to the muzzle of an air rifle and reduces down-range muzzle noise.

NUCLEUS INTEGRATED RAIL PLATFORM — Engineered to reduce scope movement and vibration, preserving its zero shot after shot.

LOCKDOWN ALL METAL CUSTOM MOUNT — This all metal mount makes scope mounting easy and ensures your scope remains zeroed in.

ASR TECHNOLOGY — Airgun Shock Reinforcement (ASR) technology allows the scope to handle the specific recoil of a spring powered airgun.

NEXT GENERATION

The Next Generation APX is the benchmark of multi-pump air rifles. It redefines the standard of airguns designed for younger and small-framed shooters. The NXG is built with a multitude of modern-day features, including an automatic safety – a feature never before seen on a multi-pump rifle of this type.

GERMAN CRAFTED. AMERICAN BUILT.

RWS German-made air rifles are legendary for quality, power, and precision. They've been handed down among shooters for generations. Today's global economy leads to global partnerships like the ones forged here with Umarex, RWS, and Minelli. We are combining the best attributes of these three leaders to make products that are exquisite to behold and a pleasure to use. The RWS Models 3400 and 3500 are the perfect combination of high quality German manufacturing, Italian woodwork, and American resourcefulness. As a unit, this international partnership works beautifully together to give the airgun hobbyist or hunter unparalleled quality, aesthetics, and value that can last a lifetime.

BUCK MARK® URX

Single shot break barrel design

BUCK MARK® URX

One of the newer designs to bear Browning's Buckmark is the Buck Mark® rimfire pistol. We've taken this favorite of campers, hunters, and target shooters and made an easy cocking, accurate air pistol that's hard to put down. The Buck Mark® URX shoots .177 caliber pellets and features a Weaver-type rail for mounting an optic.

FEATURES

- Lightweight and easy to use
- Spring piston break barrel
- Integrated Weaver rail
- Fixed front sight blade
- Adjustable rear sight
- Automatic safety
- Rifled barrel
- Ergonomic ambidextrous grip
- Single stroke cocking mechanism

BROWNING: A LEGACY

The Browning story begins in the frontiers of Utah over 150 years ago and grew from there to become one of the most traveled and storied names in all of firearms history. John Moses Browning designed many iconic firearms and lent his name to what became one of the most beloved brands in America and all over the world. The company that bears his name has built upon John Browning's legacy with modern products that join new technologies with tried and true principles of manufacturing.

WHAT MAKES A GUN A LEGEND?

There are products so universally ingrained in pop-culture that they need no introduction. The replicas included in our Legends brand are pieces of history woven into global popular culture—instantly recognized anywhere, by almost anyone. From the dusty, wild days of the American West, to the global tensions of the Cold War, our replicas span the course of history. Our select replicas are ingrained in the minds of history buffs, moviegoers, and gamers all over the world.

UX 'PRIMITIVES' DON'T HAVE TO BE LOW TECH

Some shooting devices have been around for a long, long time. The humble blowgun and sling shot have changed a little over the years, but we've given them modern upgrades! Check out our aiming assist technologies, auto feed ammo storage solutions, and integrated lasers that help you aim. Wrist rests for stabilization, magnetic ammo pockets, and contoured grips are all modern-day enhancements that allow you to keep the backyard fun rolling all day.

2219003

AXEON™
OPTIC SOLUTIONS

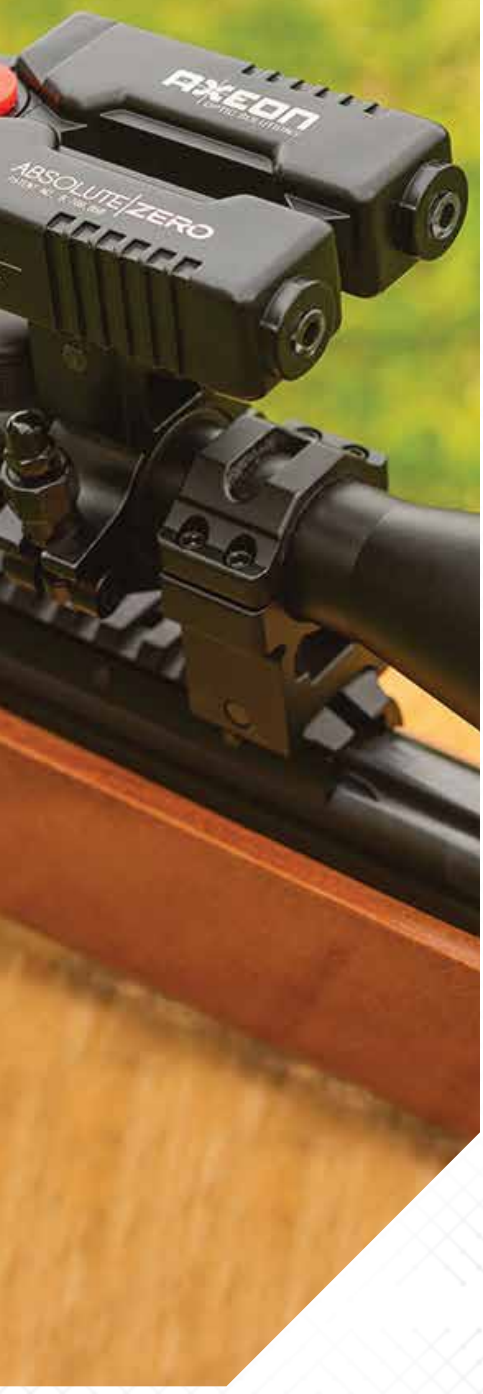

Axeon® Optic Solutions combines years of engineering, field knowledge, research, and modern technological advances into a solid array of sight enhancing products for outdoors men and women. The rifle scopes, electronic sights, long range, and sighting-in devices offered by Axeon® range from traditional hunting and shooting optics to cutting edge sporting accessories. Axeon® strives to build innovative technology designed to meet the needs and desires of today's sportsmen. These extremely durable products are proven to perform in the most rugged conditions, while keeping prices lower than the competition. When technology meets affordability, you're clearly on target.

EASY ONE-SHOT ZERO

Includes rail-to-rail adapter

2218602

REFLECTIVE CHART

For use with Axeon® Absolute Zero®
Visibly reflects red lasers in bright sunlight
[3] per package

ATTACH. SHOOT. ADJUST. ZEROED.

The Absolute Zero® is designed to take the stress and guesswork out of zeroing-in a scope. This device is much more helpful than a bore sight in getting your scope zeroed in. The method is simple: If two nearly parallel laser beams are pointed in the same direction as your muzzle and those two beams do not move in relation to the muzzle, you can shoot one shot to find out where the bullet lands on your target and make adjustments to your scope. As long as the lasers are positioned on the target in the same place as when the shot was fired, while you adjust the scope, it will be zeroed at 25 yards. All that is left is to adjust the scope to compensate for the bullet rise at 100 yards.

HOW IT WORKS

+ Zero your rifle at 100 yards.
+ Mount the Second Zero® onto your scope's bell or rail.
+ Flip lens down (bell) or up (rail).
+ Hold crosshair directly on the target at the Second Zero's prescribed distance.
+ Shoot.
+ On at 100 yds and on at 330 or 530 yds. Shot will be in the kill zone of a target at 330 or 530 yards.
+ Rimfire, pistol calibers, and subsonic calibers will produce alternate ranges using the Second Zero®.

BE A LONG RANGE SHOOTER

For shooters and hunters who have targets at greater distances than their zero, the Second Zero is a fast and incredibly simple shooting solution. This precision optical prism was developed by John Baker of TACOMHQ as a fast-firing solution for shooters who need rapid access to an alternate zero. The Second Zero is available in both Picatinny rail and scope bell mount configurations as well as a 4.3 MOA/330 Yard Zero and an 11.5 MOA/530 Yard Zero. Hitting dead on at greater distances has never been easier. Simply zero in your rifle at 100 yards and engage the Second Zero. You have now created a no guesswork additional zero.

NIGHTVUE™

Night vision for your binoculars
520nm green binocular laser

TURN REGULAR BINOCULARS INTO NIGHT VISION

The beam diameter of the NightVue™ is quickly adjusted with the simple, one-finger turn of a dial, allowing you to focus the green laser illumination where you need it most. Open the beam wide for quick, close-in illumination or narrow the beam to illuminate and see your target up to 250 yards in any weather condition.

NIGHTVUE™ FEATURES

+ USB charger included
+ Fits most porro and roof binoculars
+ Water-resistant, weatherproof housing
+ Penetrates fog
+ Weighs just 1/2 lb.

2218603

AM3 MONOCULAR

8x32 mm

NIGHT OR DAY

Some devices are just handy and useful to have around, like the Axeon® AM3. The AM3 is a combination monocular and light with a size and weight small enough for a jacket pocket. It is a must-have for close-range hunting. The bright LED light provides ample illumination for the early morning hike to the stand and the 8x magnification is handy to quickly glass the horizon and bush for game well over 50 yards. The compact Axeon® AM3 is perfect for scouting locations at night or for the nose bleed section at your favorite stadium.

KEY FEATURES - AM3

+ 8X magnification
+ Integrated 250 lumen light
+ Light size adjustable
+ Rubber E-Z grip
+ BAK-4 prism glass
+ Water and fog proof
+ Compact, lightweight design in all-weather polymer housing

NEW! RGY DOT SIGHT

Red / Green / Yellow dot sight
Fits Picatinny and Weaver rails

SET YOUR SIGHT IN LOWER LIGHT

Low light hunting or shooting comes with its own needs and the Axeon Optics RGY 1X30 mm dot sight is ready to perform no matter the light conditions. This sight utilizes three colors, red, green, and yellow to allow you to make the perfect choice based on the conditions. Red and green are great in daylight and overcast outdoor light, but the yellow dot really optimizes those early morning or later afternoon hours when the sun is going down. The yellow doesn't overpower your eyes. Powered by one easy to find CR2032 battery, the RGY has a run time of 100 hours. Windage and elevation are adjustable in 1/2 MOA clicks and the RGY is shock rated for 800G.

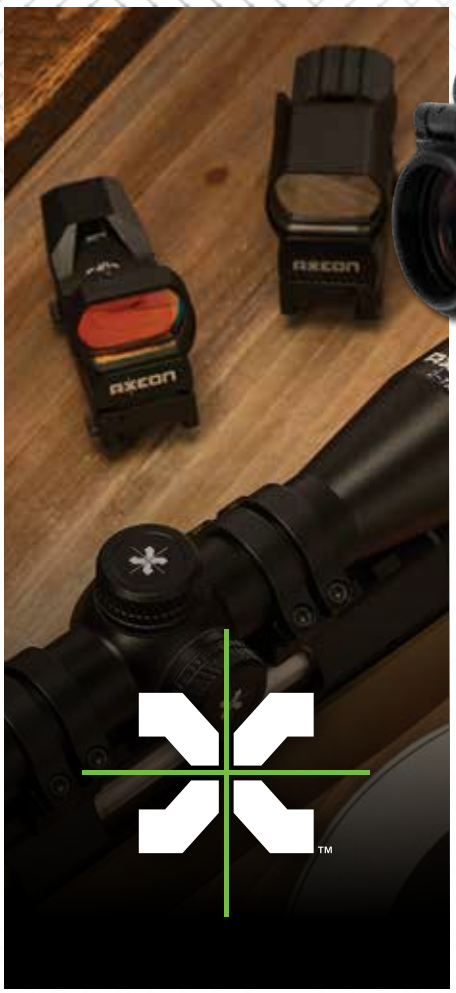

2218665

FAST TARGET ACQUISITION

Axeon electronic sights get you clearly on target faster and in a wider range of lighting conditions. They allow you to keep your natural view of the target and its surroundings. Applicable anytime you would use iron sights and at the same distances. Axeon electronic dot and reflex sights are ideal for high-speed acquisition and close to medium range targets.
With a wide range of uses that include self-defense, law enforcement and military, hunting, plinking, and competition, when technology meets affordability you're clearly on target.

AXEON RIFLE SCOPES

Visibility, durability, and dependability are all on the line when you're ready to pull the trigger. Axeon Optics Rifle Scopes combine the technologies required to identify your target's kill zone with the features found in many high-end optics. These scopes give you optimal performance at an affordable price. For the hunter or the competitor, when technology meets affordability, you're clearly on target with Axeon Rifle Scopes.

INGENIOUS TECHNOLOGY & LEADING FEATURES

Creative thinking and innovative engineering have led to the creation of an advanced line of optic devices designed specifically for the modern shooter. With technology at the forefront, Axeon Optics are designed, machined, and assembled to give you long lasting clarity, dependability, and ease of use. These technologies and features are fused together using modern-day manufacturing methods to create affordable optics that clearly get you on target without compromising build quality, use, or reliability.

EXUDE™

DIRECT LIGHT ILLUMINATOR

By OPTICAL DYNAMICS™

Well over a century after the innovation of the flashlight, there is finally a device that projects light directly. It's called the Direct Light Illuminator from Exude™ by Optical Dynamics™. It's the un-flashlight!

The revolutionary Direct Projection Technology infused within these illuminators uses state-of-the-art lenses to focus a direct beam of light that is pure, clean, and powerful. Flashlights disperse a wide cast of distorted light, inefficiently wasting much of the light it produces. The light generated by these Exude™ Illuminators is a narrow beam of clean, intense, white light that lets you see tremendous detail up close and at great distances.

@OpticalDynamicsLight @OpticalDynamicsLight

Red and green lenses

LIGHT GETS PROJECTED WITHOUT BEING REFLECTED

Reflected light spills far and wide, inefficiently wasting much of the light generated by flashlights. The direct light from an Exude™ Illuminator is optically pure and does not spill, so all of the light produced is projected onto the subject, making it much easier to identify what you are trying to see at great distances.

ITEM	NUMBER	DISTANCE	F.O.V.	LED CHIP MAX. OUTPUT	COLOR	RUN TIME	LENS DIAMETER

EXUDE OD40 GEN II

- 20% brighter than original OD40
- Three brightness settings
- USB rechargeable battery with charger and cord
- Direct projected beam of optically pure natural light
- Identify objects in the dark up to 235 yards
- Simple Bell-turn focus
- Machined aircraft-grade aluminum housing
- State-of-the-art optical lenses
- Pure, clean, and powerful
- IPX7 Waterproof | IPX6 Dust Proof
- Scope and firearm mountable
- Cordura® zip-close storage case
- CREE® XL2 LED

OD40 Mount system - 2218803

EXUDE BRIGHT IS AN UNDERSTATEMENT

The fact is, direct light illuminators are not flashlights. A flashlight loses over 50% of its potential light projecting performance through reflection. Just look at the broken or dirty light your flashlight gives off. An Optical Dynamics Direct Light Illuminator is the un-flashlight. Its light is projected directly from the source. It doesn't bounce off anything, but instead is gathered and kept pure and clean by a series of optical lenses into a direct, focusable beam. You don't want to look in the beam of a direct light illuminator—it's like looking at the sun.

2218804 | 2218805

EXUDE OD50

Includes [1] hard case, [2] rechargeable batteries, [1] USB charger and cord, [1] cleaning cloth.

- Direct Projection Technology
- Narrow direct beam of optically pure light
- Identify objects in the dark up to 400 yards
- Four cluster ultra powerful CREE® XHP50 LED chips
- Simple ring-turn focus
- State-of-the-art, fully multi-coated optical lenses
- Three brightness settings
- Rechargeable
- Charger and USB cable included
- Light projected at natural wavelength
- Shockproof and waterproof
- Machined aircraft-grade aluminum housing

CALS™
COLLIMATED AMPLIFIED LENS SYSTEM

The Collimated Amplified Lens System — CALS — a patented photonics lens system that projects a pure, narrow, adjustable column of direct light that perfectly illuminates your target, not the entire area.

ELITE FORCE®
FRONT LINE RESOLUTION

UMAREX® AIRSOFT

The “King of Replicas” doesn’t stop at making quality firearm branded airguns. Umarex brings the same attention to detail of its airguns to its extensive line of high quality airsoft guns. These plastic-BB firing replicas offer the opportunity for shooters to apply their skills on the range with a variety of airsoft pistols and rifles. From spring powered pistols to automatic electric guns, there’s not a practice drill, simulation, battle, or competition that can’t be won with an airsoft gun from Umarex.

ELITE FORCE AIRSOFT

When it’s time to get serious, fierce competitors expect their equipment to perform without fail. Whether its training, mil-sim, or target practice, shooters can count on the competition and elite-grade airsoft guns from Elite Force and Umarex. With license partners such as Amoeba, Avalon, Beretta®, GLOCK™, Heckler & Koch®, and Walther®, these airsoft guns are proven to be reliable and durable, no matter the battlefield. These replica airsoft guns are constructed with high quality components to ensure optimal performance and feel realistic during engagement. Extreme airsoft guns from Elite Force are constructed so that you can depend on them to be your front line resolution.

UX AEG AIRSOFT

Our Automatic Electric Guns, or AEGs, are modeled after popular firearms such as the Heckler & Koch MP7®, HK416, Beretta® ARX 160, and UZI®. Electric guns come equipped with a semi and full-auto mode. In full-auto mode, Umarex AEGs will propel airsoft BBs downrange as long as the trigger is held down. It's the full-auto "happy switch" of an AEG that is appealing to shooting enthusiasts.

GLOCK™ AIRSOFT

In 1982, Gaston Glock took the conventional wisdom for manufacturing steel frame pistols and replaced it with revolutionary thinking and design elements. 37 years later, GLOCK™ firearms are available in numerous calibers and configurations and are the go-to sidearm for police and military agencies around the globe. Umarex® owns the exclusive license to create GLOCK™ replica airsoft guns for the North American recreational shooting market.
